EXPERIENCE

Crescerance, Remote— QA Engineer

September 2022 - PRESENT

In my current role, I develop comprehensive test plans and write detailed test cases. I provide test estimation and conduct unit testing, sanity testing, and regression testing. My responsibilities also include Mobile app testing, feature testing and creating bugs in Azure. I manage release trackers and query bugs related to specific features. Additionally, I work with the BDD framework to automate test cases, use Git for code commits, and run automated test cases using Jenkins. I also automate mobile app features using Appium. Have some exposure to Api testing With postman.

Techwin Labs, Mohali— QA

Nov 2021 - Sept 2022

During my tenure at Techwin Labs, I wrote test cases for mobile apps and conducted build testing provided by developers. I tested APIs using Postman, performed unit testing, and regression testing. Additionally, I explained bugs to developers and used Jira and ClickUp for test management.

EDUCATION

Kurukshetra University, Kurukshetra— BCA

May 2012 - April 2015

Graduated with 67.9%

PROJECTS

Restful Booker — API testing With Postman

Tested the API to make sure it works well and is reliable and secure. Used popular testing tools and frameworks to create both positive and negative test cases

SKILLS

Manual testing

API testing

Functional Testing

Regression Testing

Sanity Testing

Postman

Database Testing

BDD, core java
